PROFESSIONAL SUMMARY

Junior Software Developer and recent Diploma in Software Development graduate with hands-on experience building web, desktop, and mobile applications. Skilled in C#, .NET, SQL, PostgreSQL, React Native, TypeScript, and cloud technologies, including Azure. Experienced in object-oriented programming, database design, system modelling, and application development. Currently developing an AI-powered training and coaching platform, with a strong interest in software engineering, problem-solving, and building scalable, user-focused solutions. Eager to contribute to an engineering team while continuing to grow technically and professionally.

EXPERIENCE

Website Developer (Volunteering)

Dale College

2018 - 2022

- Maintained and updated the school website in WordPress to keep content current
- Managed site structure, layout and presentation to improve accessibility for visitors
- Built early experience in content management, attention to detail and digital communication

Founder & Freelance Web Developer

SiteStudio

2024 - Present

- Designed, developed, and maintained responsive websites for clients, handling both front-end and back-end development.
- Built user-friendly interfaces using React, HTML, CSS, and JavaScript, with WordPress for selected projects.
- Worked with databases, APIs, and backend services to deliver functional, integrated web applications.
- Managed projects independently, from gathering client requirements and designing solutions to development, testing, deployment, and ongoing maintenance.
- Leveraged AI-powered development tools to improve productivity, troubleshoot issues, and streamline coding workflows.
- Tech Stack: React, HTML5, CSS3, JavaScript, WordPress, APIs, databases, and AI development tools.

EDUCATION

Diploma in Information Technology – Software Development

Rosebank College

- 21 distinctions across 24 completed modules
- Modules include Programming (Java, C#, Kotlin, TypeScript, Python, JavaScript), Data & Relational Databases, Information Security, IT Project Management, Open Source Coding and React Native
- SETA Bursary recipient supporting final-year studies

National Senior Certificate (Matric)

Dale College Boys' High School

- High School Prefect – leadership, responsibility and teamwork

SKILLS

Programming
C# | **Java** | **Python** | **JavaScript** | **TypeScript** | **SQL** | **Kotlin** | **HTML** | **CSS**

Frameworks
.NET | **ASP.NET Core** | **WPF** | **React Native** | **Expo**

Databases
PostgreSQL | **SQL Server** | **MySQL** | **Supabase** | **Firebase**

Cloud & Deployment
Microsoft Azure

Tools
Git | **GitHub** | **Visual Studio** | **JetBrains Rider** | **VS Code**

Software Engineering
Object-oriented programming | **UML** | **ERDs** | **database design** | **software architecture** | **debugging and testing**

CERTIFICATIONS

Agentic AI Certified Foundations Associate

PROJECTS

LetsMove – AI Training Generator

- Developing a cross-platform mobile application using React Native and TypeScript to help athletes manage training schedules, workouts, and performance progress.
- Designing a PostgreSQL database and integrating Supabase for authentication, cloud data storage, and backend functionality.
- Exploring AI integration to generate personalised training plans, provide training recommendations, and support coaching workflows.
- Building a modular, maintainable application architecture with a focus on usability, scalability, and future enhancements.
- Tech Stack: React Native, TypeScript, Supabase, AI Integration.

Cybersecurity Awareness Chatbot

- Developed a desktop cybersecurity awareness application in C# and .NET
- Implemented login, interactive quizzes, task reminders and activity logging
- Built a responsive WPF/XAML interface, structured into reusable components for maintainability

Contract Monthly Claim System

- Designed UML class diagrams and system architecture before implementation
- Built a prototype GUI supporting the contractor claim submission workflow
- Applied object-oriented principles to separate business logic from the interface

Gift of the Givers

- Gift of the Givers is an ASP.NET Core MVC application developed for the **APPR6312 Part 2 POE**. It provides a donation and volunteering experience for the public, together with an employee-facing area for managing operational information. The solution also contains an Azure Functions project that creates donation certificate identifiers and a reusable helper library packaged for NuGet consumption.

LANGUAGES

English
Fluent

Xhosa
Intermediate

STRENGTHS

- **Problem Solving**
- **Leadership & Teamwork**
- **Communication**
- **Time Management**
- **Adaptability**
